

HEAVY-DUTY TRUCK STUDY

Kansas

POLICE CRASH REPORT (PCR) DATA FORM

This is the CCFP Police Crash Report (PCR) Data Form for your State. This form prioritizes data currently collected through existing State PCR forms and highlights additional data attributes required to answer Heavy-Duty Truck Study research questions. We anticipate the additional data fields required to be minimal given the narrow focus of in-scope crashes (i.e., fatal crashes involving Class 7 and 8 trucks) for the study.

Action Items: What We Need from Your State

- Review this form to identify any additional data attributes (in red) required for the Heavy-Duty Truck Study and start planning how to gather them.
- If your State is already collecting a required (red) or optional (blue) data attribute, email CCFP@dot.gov to let us know. We will work with you to update our records.

The sections below provide tips on how to use this form.

Understanding This Form

Summary Table

The table at the top of the form shows how many required data attributes and optional data attributes your State already collects, organized by PCR section.

Color Coding

The colors in the form indicate what data attributes your State currently collects, are required to collect for the Heavy-Duty Truck Study, or are optional to collect. Refer to the key below as you review form.

Black: Required for the Heavy-Duty Truck Study and already collected by your State.

Red: Required for the study but not yet collected by your State.

Blue: Not yet collected by your State, and optional to include.
